John,

Many thanks to you and Frank Pinto for attending tonight's Council meeting. The Randolph Township Council is unanimous in its support of extending the rail spur so as to serve the BETA (former Westinghouse site) Corporate Park. As stated in the meeting, the BETA property's approved site plan actually depicts a rail siding serving several buildings in the complex, most notably building # 4.

We feel strongly that the rail improvement can offer an important dimension to the park, one of the town's largest tax payers and will better position the complex to compete in a highly competitive market for meaningful manufacturing opportunities.

Again thank you for attending the meeting.

John Lovell
